SH -smoking, -etoh

Ros

No recent chest pain, dyspnea,pnd orthopne No cough, bronchitis or pneumonia No naus, vomiting, diarrhea Const No change in urine

Other ROS negative

+ joint pain r knee (s/p trauma)

PE
120/70
Anicteric
No oral lesions
Chest clear
JVP not elevated
Lungs clear
Cor reg no s3, no rub
Abd soft, n/t no masses app
Ext right leg in immobilizer, no edema
Neuro grossly nonfocal

IMP: CKD class 3. Etiology is not known but he clearly has been stable for many years. I will check urinalysis to assess for hem and protein. I will also check ultrasound, though no gross deformity seen on CT. I will check for sequelae of CKD and I will see him in followup. He is already on ACEI and BP is well controlled.

Follow-up and Disposition

Return in about 4 weeks (around 2/28/2008).

Transcription text:

Mr. Rollins presents with 3 separate complaints and requesting out of work letter. He states he needs out of work letter even though he has not worked for year and a half because he takes it to the VA to get some financial compensation. His 3 complaints are neck and back pain after a motor vehicle accident which occurred on 12/20/07, right knee pain after a slip and fall at Circuit City establishment on 1/28/08, and bright red blood per rectum today. The motor vehicle accident, he was rear-ended while sitting at a stop sign. He was seat belted driver and a car hit him from behind He developed neck and back pain and he is requesting referral for physical therapy and treatment of this. His right knee pain, he had a slip and fall at Circuit City on 1/28/08. Was transferred and treated and released from Boston Medical Center emergency room where they put him on ibuprofen and tramadol which he filled today. He was placed in an Ace wrap to the knee and then a long knee splint. He states that he likes knee splint as he thinks it makes him feel better, but he still has a tremendous amount of pain and swelling in his knee. He states that the clinician who saw him at Boston Medical Center told him he needs to have an MRI of the knee for further evaluation and

treatment. The bright red blood per rectum occurred during a bowel movement today. He has not had that this issue in the past. He states it was bright red during his bowel movements and afterwards and this caused great concern. He had no pain during the movement and states he was not pushing hard. He does say he has had some perianal itching recently He has no history of hemorrhoids. He has no other complaints and no abdominal pain.

On physical exam, he is in moderate distress secondary to his multiple illnesses. His cervical spine has very limited range of motion as he would not flex, extend, side bend, or rotate for fear of pain in the neck. His thoracic spine has limited range of motion, again secondary to neck pain. His lumbar spine, he will only flex to 20-30 degrees and stop due to pain in the low lumbar region and he could side bend minimally. His knee is tender to palpation on the right. There is a mild amount of edema. There is no ecchymosis. Negative anterior and posterior drawer. There is no fullness in the posterior fossa. He has pain on full weightbearing of the knee. A rectal exam was performed. He has got guaiac negative brown stool in the vault, no hemorrhoids were palpated.

DIAGNOSIS: Cervical sprain, lumbar sprain, knee sprain and lower Gt bleed.

TREATMENT: He is to use ibuprofen and Ultram as written for him by Boston Medical Center. He will be referred to orthopedics for further evaluation of his knee, back, and neck and refer to physical therapy for the same. He will also be referred to Gastroenterology for evaluation of his lower GI bleeding, which appears to have stopped. He will return back here in 2 weeks' time for reevaluation. He will continue using his knee splints for his knee. If any other symptoms occur prior to his appointment time, he was welcome to come back here. Otherwise, follow up with the consult as suggested.

Hi Dr.Diamond,

Pt has an appt on 1/31/08 with Dr. Sheridan for Nephrology is this ok? Pt was under the impression you wanted him to be seen sooner.

Please let me know and I will call the pt.

thanks

Regarding: pt call back Contact: 617-999-0463

Hi Dr. Diamond,

This patient is was quite upset today, trying to book a nephrology appt. (My office just happens to be across from their appt desk) He Couldn't get an appt until 1/31, was mentioning something about to the MA from Med Specs "what happens between now and then, I have this letter that says I have a serious problem". He asked me to explain what was wrong with him. The number above is his cell, I told him I'd let you know that he was concerned about your letter. I asked him the best number to reach him and advised him to answer the call because from your letter we've tried to call him three times already to discuss the results.

Sorry for the long message,

Leann Laneau Cardiology Supervisor

Massachusetts General Hospital **Emergency Department Record**

DOB: 08/12/1956 Pat: ROLLINS, JAMES L MRN: 1948278 51y Sex: M

Registration Date/Time:

02/01/2008 09:02 PM

Provider: Leslie Milne

** Signed**

ED Note

Chief Complaint:

R knee pain

HPI:

51 yo M with h/o CAD s/p NSTEMI, DM, HTN, HLD here s/p fall 1/28 onto R knee. Seen at BMC, given knee immobilizer and told to follow up with MRI. Patient has not contacted his PCP as he has been in too much pain to set up any follow up appt. Now with worsening pain in R knee. Has been in knee immobilizer and using crutches. No new

trauma. No fevers, no chills.

PMHx:

HTN, HLD, CAD, DM

Meds:

Simvastatin Lisinopril Ultram Ibuprofen

Social Hx:

Lives in Roxbury with wife. Denies tob/EtoH/illicits

Physical Exam

Vitals:

T P BP RR WT Sa₀₂ 97.9 58 141/81 20 96%RA

Musculoskeletal:

R knee tender diffusely. Flexion and extension limited by pain. No tenderness over

femur, ankle, tib/fib. DP/PT pulses 2+.

X-ray Interpretation:

R knee-

IMPRESSION:

1. No evidence of fracture or dislocation. 2. Probable small right knee joint effusion.

3. Moderate degenerative changes.

Impression/Plan:

51 yo M with increasing R knee pain s/p fall earlier in week

ED ATTENDING PHYSICIAN NOTE

Date/Time of Encounter:

2245

Medical Records Reviewed:

yes

HPI:

51 yo male, slipped 3 days ago, twisted and fell on his right knee. Having swelling and sliding sensation within the joint. Seen at BMC and put in knee immobilizer, crutches and referred back to his pcp for an mri. He did not bring his crutches with him (they are at

ROS:

no fever, sob, abd pain

Vitals:

See Nursing Notes alert, no resp distress

PE:

right knee: + large effusion, limited rom, tender diffusely, no erythema or warmth, unable

to fully access due to pain, +2 dp

Medical Decision Making

ED Course:

IMP: right knee effusion, suspect possible ACL vs meniscal tear PLAN: mri scheduled for 2/3, sports med follow-up, crutches, rom

Condition on Discharge:

Stable

Emergency Department Record

Pat: ROLLINS, JAMES L

MRN: 1948278 DOB: 08/12/1956 51y

Registration Date/Time: 02/01/2008 09:02 PM Provider: JOSHUA REMPELL

Discharge Order:

Discharge this patient from the ED.

PCP notified by MD:

No - Other explanation

Benefits Assigned:

Y

Discharge Note Date/Time:

02/01/2008 23:11

Discharge Status:

Discharged

Condition on Discharge:

Stable

Patient States Complaint:

R LEG PAIN

Diagnosis:

R knee pain

Standardized Discharge

Instructions:

The patient was given printed instructions for crutches (English). The patient was given printed instructions for non-steroidal anti-inflammatory drugs (English). The patient was given printed instructions for narcotic analgesia (English). The patient was given printed instructions for sprains, fractures and bruises (English).

Treatment Rendered:

History and physical exam. x-ray which was negative for a fracture or dislocation. Pain

medication. Scheduled MRI.

Discharge Medications:

Tylenol 650 mg every 6 hours for pain control.

Oxycodone 5-10 mg every 4-6 hours for breakthrough pain.

Disposition, Follow up & Instruction to Patient:

You should follow up with the Orthopedic sports clinic. Call 617-726-7797 to schedule the first avalaible appointment. You likely have a tear of one of your ligaments in your knee. Continue to use the knee immobilizer and crutches and do not bear weight on your leg until your appointment. You have an MRI scheduled 2/3/08 at 7 AM. Directions are provided.

If you have worsening pain or other concerns return to the ER.

Please call your primary care physician during normal business hours to report this visit.

I hereby acknowledge receipt of patient instructions. I understand that further diagnosis and treatment may be required and I have had emergency treatment only and I may be released before all medical problems are known and treated. I will arrange for any follow-up care as instructed.

RADIOLOGY (cont) from 01/28/2008 through 03/05/2008

ROLLINS, JAMES L

MRN: 1948278 Sex: M DOB: 8/12/1956 Age: 51y

TECHNIQUE:

Magnetic resonance imaging of the RIGHT KNEE was performed WITHOUT injected contrast.

COMPARISON: Correlation with radiographs of the knee dated 2/1/08.

FINDINGS:

Joint effusion: There is a moderate joint effusion with synovitis.

Menisci: There is a free margin tear of the posterior horn of the medial meniscus, close to the root attachment site, with a horizontal component extending into the body. The lateral meniscus is unremarkable.

Tendons and Ligaments: The fibers of the medial collateral ligament are disrupted, with thickening and increased signal, consistent with a full thickness tear at the femoral attachment site. The lateral collateral ligament appears normal. The ACL and the PCL are intact. The extensor mechanism is also intact. There are enthesopathic changes of the attachment of the infrapatellar tendon to the tibial tubercle.

Articular Cartilage: There is thinning of the articular cartilage of the medial tibiofemoral compartment, with small flap formation along the weight-bearing surface of the medial femoral condyle. There is fissuring of the articular cartilage in the patellofemoral compartment, over the medial patella. There is also thinning and fissuring of the medial and lateral trochlear cartilage.

Bone: There is no evidence of fracture.

Soft tissues: There is increased signal in the posterior and medial soft tissues consistent with edema. This is likely secondary to rupture of a small Baker cyst, seen posteriorly.

IMPRESSION:

Tear of the posterior horn and body of the medial meniscus.

Full thickness tear of the medial collateral ligament.

Cartilaginous changes of the medial tibiofemoral and patellofemoral compartments.

Moderate joint effusion with synovitis.

Ruptured small Baker cyst.

In accordance with the department policy, the teaching physician, Dr. Susan Kattapuram has reviewed all images, and edited the report as required.

Exam Code: XRKNE4/RIGHT

Ordering Provider: REMPELL, JOSHUA S MD

HISTORY:

51M S/P TRAUMA TO R KNEE W/ INCREASING PAIN/SWELLING, PLS

ASSESS FOR FX

REPORT:

HISTORY: As described above.

COMPARISON: None.

FINDINGS:

There is no evidence of a fracture or dislocation. Although there is relative preservation of the right knee joint spaces, mild to moderate degenerative joint disease is manifest as osteophyte formation along the patellar and lateral tibial articular margins. Enthesopathic changes involve the site of patellar tendon insertion on the proximal tibia. Ill-defined increased density in the expected location of the suprapatellar fat pad likely represents a small right knee joint effusion.

IMPRESSION:

- 1. No evidence of fracture or dislocation.
- 2. Probable small right knee joint effusion.
- 3. Moderate degenerative changes.

EMERGENCY DEPARTMENT

Note for visit on 03/16/08

NOTE:

EDVISIT^07300288 ROLLINS, JAMES^03/16/08 WITTELS, KATHLEEN I saw this patient primarily.
HISTORY OF PRESENT ILLNESS: This is a 51-year-old male who fell a few months ago and sustained an injury to his right knee, which he believes was a right medial meniscus injury. He is about to be going to physical therapy; however, he is staying in a veteran shelter at this time and needs clearance in order to be able to sleep on the bottom bunk because he says he is unable to climb up to the top bunk. He is not taking any pain medication at this time. He does complain of some pain in his right knee. He has had no fevers or other complaints. PAST MEDICAL HISTORY: Prior MI, hypertension, and hypercholesterolemia. SOCIAL HISTORY: The patient denies smoking, alcohol, or IV drug FAMILY HISTORY: Significant for diabetes. REVIEW OF SYSTEMS: As per my HPI, additional systems are reviewed and are negative. MEDICATIONS: Lipitor, he is unsure of the names of his other medications. ALLERGIES: No known drug allergies. PHYSICAL EXAMINATION: The patient is awake and alert, in no distress. He is afebrile with normal vital signs. Examination distress. He is afebrile with normal vital signs. Examination of the right knee reveals no bruising or abrasions. There is some mild swelling of the knee. The patient has good range of motion. Tenderness is maximal along the medial joint line. EMERGENCY DEPARTMENT COURSE: This is a 51-year-old male who sustained an injury to his right knee. He has had no new trauma to the knee. The patient is given Tylenol and ibuprofen for pain control in the Emergency Department. He is also given a note stating that he should be sleeping at a bottom bunk until cleared by his primary care physician and orthopedist. PRIMARY DIAGNOSIS: Right knee pain. DISPOSITION: Discharged. CONDITION ON DISCHARGE: Satisfactory.

Authorization for Release of Information

Lunderstand that **Faulkner Hospital** is part of an integrated health care delivery network known as *Partners HealthCare System*. Lunderstand that my health care information, whether stored on paper, computer, film, or other medium is available to *Partners HealthCare System* now, and in the future on a Need-To-Know basis to health workers involved in my care, teaching, institutional review board approved research, and/or internal utilization management and quality review. Lunderstand that **Faulkner Hospital** is committed to respecting the privacy and **confidentiality** of my medical information. **Faulkner Hospital** protects my privacy and confidentiality by complying with state and federal law and by creating and putting into practice policies and procedures that allow access of my personal medical information **only** for legitimate reasons. If I have questions about the privacy of my medical information or feel I need a level of confidentiality or privacy that goes beyond the customary practice of **Faulkner Hospital** as described above, I will speak with my nurse, physician, or healthcare provider.

nurse, physician, or healthcare provider.
Authorization for Release of Information to my Insurance Company
I hereby authorize the Faulkner Hospital to release information from my medical records to my Insurance carrier, in order to process my hospitalization claim.
I expressly authorize Faulkner Hospital to release any and all information necessary to complete my hospitalization claim—including but not limited to sensitive information such as, HIV/AIDS testing, drug/alcohol treatment, and/or mental health treatment. Such authorization shall be effective from until such date as it is expressly revoked by me, in writing.
Insurance Certification and Assignment
Licertify that It: Information given by the in applying for payment under any title of the Social Security Act or by any other third party exposs is correct it assign to Faulkner Hospital, Inc. all hospital benefits due the under the terms of said policies and programs and payment for the unpaid charges of the physician(s) for whom the hospital is authorized to bill in connection with its services.
LAGRET THAT LAM SESPONSIBLE FOR PAYMENT IN FULL OF ALL CHARGES DUE TO FAULKNER HOSPITAL, INC. FOR ALL SERVICES RENDERED WHICH ARE NOT PAID BY THIRD PARTY PAYORS.
Security of Medicare Benefits to Provider and Physicians
1. Legrity that the information given by me in applying for payment under Title XVIII of the Social Security Act is correct. Lauthorize any holder of medical or other information about me to release to the Social Security Administration or its intermediaries or carriers any information needed for this or a related Medicare Claim. I request that payment of authorized benefits be made on my behalf. I assign the benefits payable for physician or other medical services to the physician or organization and authorize them to submit a claim to Medicare for payment. I understand that I am responsible for any health insurance deductibles and co-insurance.
2. For outpatient services, I request that this authorization apply to the period to
Consent to Hospital Care and Medical Treatment
I, the undersigned, do hereby give my voluntary consent for hospital care encompassing necessary procedures and medical treatment by my attending physician, his/her assistants and his/her designees as is necessary in his/her judgement. I have read the foregoing and I understand it.
